## The World Pasta Industry in 2011

Like every year, we have completed our Annual Survey on the World Pasta Industry.

We would like to thank all the Associations and Companies that contributed to the updating of this useful information.

The following tables have been prepared with the contributions received so far. We have tried to include estimates of missing data on production and domestic consumption whenever possible.

World trade figures are sourced from Global Trade Atlas, supplied by Global Trade Information Services ([www.gtis.com](http://www.gtis.com)).

Please note that for those countries for which no updates have been received yet, we have used the most recent figures available.

*13.6 million tons* of pasta produced around the world, by more than **45** producer countries around the world

More than **300** different pasta shapes available and an average per capita consumption ranging from **26** and **2 kg**.

These are the figures for pasta, which give rise to a reflection on its role in the future of global alimentation.
